

# LOAD MANAGEMENT PROGRAM

**ELECTRIC WATER HEATER**

**CENTRAL AIR  
CONDITIONER**

### **IT COSTS YOU NOTHING!**

The City of Olivia will connect a controller on your electric water heater and/or central air conditioner. This program helps conserve energy.

### **GET CREDIT ON UTILITY BILLS**

Each month you will receive a \$3.00 credit on your utility bill if you have your electric water heater controlled. If you let us control your air conditioner, you get a \$6.00 credit on your June, July, August, and September bills.

### **HOW DOES IT WORK?**

The City of Olivia will have a controller installed in your home and connected to your electric water heater and/or central air conditioner. During periods of peak electric consumption in the city, the controller will receive a radio signal from a computer at city hall which will turn your unit off for 15-20 minute intervals. Most customers don't even know when their water heater or air conditioner is being controlled.

### **ANY OTHER BENEFITS?**

It helps reduce the amount of electricity the city uses during peak periods, which helps reduce our cost. This helps keep your electric rates the most economical in the area!

### **HOW DO I SIGN UP?**

It's easy. Complete the form and return it to city hall.

*Please complete this form and return to the City of Olivia.*

City Account No. \_\_\_\_\_

I'd like a controller for my:

Air Conditioner\_\_\_\_ Water Heater\_\_\_\_

Name: \_\_\_\_\_

Address: \_\_\_\_\_

Phone No: \_\_\_\_\_

I have read and understand the information provided. I want to have a controller installed on my electric water heater/and or central air conditioner. I understand this is for a minimum of one year and my participation will be carried forward annually. I will notify the City immediately if I convert to a gas water heater, or otherwise cause the controller to be disconnected or no longer in service
